01 // WHAT IT IS — IN THE SITE'S OWN WORDS

# Your bot's next bad trade gets stopped before it fires.

Reads the reason behind a trade. Refuses it when the reason does not hold up.

PROOF-OF-LOGIC:

for: kalshi and polymarket bots, perps agents, treasuries with an agent on the keys.
Spend caps limit how much you lose. This limits whether you should have been in at all.
status: live on base mainnet
author of record: DJ · @Djzs_ai

## THE GATE

> start run: 00:00 · 02/11

## 02 // THREE STEPS, NO GUESSING

1 Paste the trade idea in plain text, or let your bot send it.

2 DJZS checks it for the four ways trade ideas go wrong.

3 PASS clears the logic. The trade is still yours.

Same idea in, same answer out, every time

## 03 // THE RULESET — FOUR CODES

| | | |
|---|---|---|
| M01 | NARRATIVE RESOLUTION GAP | CRITICAL · 30 |
| M02 | FALSIFICATION ABSENT | CRITICAL · 30 |
| M03 | PROBABILITY UNSOURCED | HIGH · 25 |
| M04 | CONSENSUS NO EDGE | MEDIUM · 15 |

Weights sum to 100. FAIL threshold 25.

PROOF-OF-LOGIC:

PASS: every scored fact is known and no blocking rule fired. proceed.
WAIT: a decision-critical fact is unknown. the caller halts; the response returns unknown_fields.
FAIL: a rule fired on facts the engine knows. stop.
abstain over guess.

04 // THE RECEIPT — ANYONE CAN CHECK IT

# 2.00 USDC buys a receipt on Base

whichever way the verdict went · nothing here trusts DJZS

PRICE

**2.00 USDC**

per audit · on Base mainnet · non-custodial

RAIL

**x402**

or MPP · an EAS attestation on Base

RECOMPUTE

**/verify**

djzs.ai/verify · trusts the chain, not DJZS

A receipt is a claim. This tool recomputes it. Settlement from the chain; the binding key from the intent alone; the attestation from EAS. It checks that all three agree with each other. Nothing here trusts DJZS.

## 05 // DOOR ONE — PEOPLE, NO WALLET

> djzs.ai/try

paste ..... market, your side, why, and what would prove you wrong

get ..... PASS, WAIT or FAIL and the reasons in plain words

cost ..... free · three a day · nothing to install · no wallet

receipt ..... 2.00 USDC · the same audit run again and written to Base under EAS

PROOF-OF-LOGIC:

djzs.ai/try
3 per browser per utc day without a wallet, or 5 per wallet with a signature
same engine as the paid gate
a real market is already loaded
the trade is still yours
